

PRODUCT DATA SHEET

UV Absorber Additive

UVB - 1710

Features

- Complex mixture in Liquid form
- Enhance "Light Fastness".
- No Negative effect on cured Resin
- No hindrance with secondary operations viz. printing, painting, bonding or plating

Application Area :

Water Based Resin System

Product Description :

Proprietary complex mixture of acids, UV Chemicals with modifying agents.

Physical Properties :

Active Solids	: @ 100 %
Color	: Amber
Specific gravity	: @ 1.25 @ 27°C.
Flash point	: Non-Flammable
Shelf life	: Minimum 1 year

Application Instructions :

1. Initially, we suggest to conduct the trial on laboratory scale to determine optimum addition level.
2. UVB - 1710 is effective within range of 0.1 – 1% by weight on Liquid Resin.
3. We recommend starting an evaluation at 0.5%. Depending upon the results adjust the dosage within above range.
